Protect your cars, trucks, boats and trailers with a web based GPS tracking system that greatly increases the chance of recovery if you ever suffer the loss of property due to theft. Introducing the WatchDog, Real-Time Property Tracking System from RAC.

Bartlett, TN May 1 2009 – RAC announces a new line of products that provides a higher level of security safe guarding your expensive motorized property. The Watch Dog Real-Time Property Tracking Monitor, alerts you whenever your property is moved outside of a preset area defined by the user and can help you locate your property using popular satellite imagery software. It is easy to install and is operational in minutes.

Not only is the WatchDog great for locating stolen property but it is perfect for keeping track of multiple cars in large families as well as teenagers and restricting use when appropriate. The WatchDog is easy to install with the 12VDC model (WD-1000) or the OBDII connection (WD-2000). Basic functions can be installed with ease and results seen immediately. The software is password protected for a secure monitoring and control of all of your vehicles.
